

RV WATER SOFTENER

Recharge Instructions

- Step 1. Shut water supply off.
- Step 2. Unscrew filter canister, discard filter if needed.
- Step 3. Insert diverter tube, HOLE DOWN, & fill around the outside of the tube with salt, & replace the canister.
- Step 4. Turn on the water & let it run to drain about the size of a pencil (about 20-30 minutes), or until the salty taste is gone.
- Step 5. Shut off water, replace diverter tube with a new filter, turn on the water.
- Step 6. Enjoy soft water until next recharge is needed.
